

1 **SECTION 8-21, PERMANENT SIGNING**

2 **September 30, 1996**

3 **8-21.2 Materials**

4 The second sentence of the first paragraph is revised to read:

5

6 Materials for sign bridges, cantilever sign structures, roadside sign structures, and  
7 sign mounting shall meet the requirements of Section 9-06.

8

9 **8-21.3(6) Sign Refacing**

10 The reference to "13-millimeter" in the fourth sentence of the second paragraph is  
11 revised to read "6-millimeter".

12

13 **8-21.3(9)F Bases**

14 The second sentence of the second paragraph is revised to read:

15

16 Spiral foundation reinforcement shall conform to ASTM A 82 for sign post bases  
17 and Section 9-07 for all other sign structure bases.

18

19 The second paragraph is supplemented with the following:

20

21 Concrete for sign post foundations shall be Class 20 conforming to the  
22 requirements of Section 6-02.3.

23

24 **8-21.3(10)A Sign Lighting Luminares**

25 The reference to "Section 9-28.16" in the first sentence is revised to read "Section 9-  
26 28.15".

27

28 **8-21.3 Construction Requirements**

29 This section is revised by adding the following new section:

30

31 **8-21.3(12) Steel Sign Posts**

32 Steel sign posts shall be connected to concrete bases using the following  
33 procedure:

34

- 35 1. Remove all galvanized runs and beads from washer area.
- 36 2. Assemble sign post to stub post with bolts, using one flat washer on
- 37 each bolt between plates.
- 38 3. Shim as required to plumb sign posts.
- 39 4. Tighten bolts in a systematic order to required torque while not over
- 40 tightening.
- 41 5. Loosen each bolt and retighten to required torque in the same order as
- 42 initial tightening.
- 43 6. After Contracting Agency inspection of bolt torque, burr threads with
- 44 center punch to prevent loosening.

45

46 When AASHTO M 183M or ASTM 36M steel is used for posts, a welded bead  
47 approximately 50 millimeters long shall be placed on the post approximately 150  
48 millimeters from the base connection. When AASHTO M 222M, AASHTO M  
49 223M, ASTM A 572M Grade 345, or ASTM A 53 Grade B steel is used, 2 welded

- 1 beads approximately 50 millimeters long and 15 millimeters apart shall be placed
- 2 on the post approximately 150 millimeters from the base connection.
